Consulting Services Overview

Board Cyber Advisory Services

We can advise and educate the Board of Directors to better understand cybersecurity concepts at a high level.

Governance, Risk & Compliance Consulting

Security breaches have become increasingly prevalent and require a strong GRC framework approach to address the growing threats.
SOC Management Program

We help you enhance your security program by implementing and streamlining next-generation security operations processes.

SWIFT CSP Assessments

We utilise our collective experience in cyber defense and in-depth knowledge of the SWIFT Customer Security Controls Framework to contribute to evaluating the risk drivers associated with the Swift security controls. Our experienced Swift CSP assessors will guide and assist you in the remediation of non-conformities. We partner with you to perform a cybersecurity assessment of your SWIFT-related infrastructure by reviewing, scoping, and conducting a gap analysis, and provide you with recommendations and remediation guidance leading to self-attestation of compliance with the SWIFT Customer Security Controls Framework.

Managed Security Services

Managed Detection and Response

Managed Detection and Response When you manage enough workstations and servers, keeping software up to date can quickly become complex. Streamline vulnerability and patch management with granular control over your patch management policies using our automated patch deployment solution. Enjoy further protection with pre-defined policies developed by our security professionals as well as automatic threat prevention and malicious activity rollback, for an effortless response and overall time savings. Boost your protection with Managed EDR, our enterprise-grade cybersecurity service which provides threat visibility, simple investigation tools and automated response to detect threats, reveal their full scope and origins and mitigate them rapidly.

Phishing Detection and Response

Designed for enterprise organizations, Cofense Phishing Detection and Response (PDR) platform leverages a global network of close to 30 million people actively reporting suspected phish, combined with advanced automation to stop phishing attacks faster and stay ahead of breaches. Organizations can educate employees on how to identify and report phish, detect phish in their environment and respond quickly to remediate threats. With seamless integration into most major TIPs, SIEMs, and SOARs, Cofense solutions easily align with existing security ecosystems. Cofense understands how to Improve security, ald incident response and reduce the risk of compromise.

Power Distribution & HVAC

Power & Cooling Solutions

Reliable power is the foundation of your data center and server rooms. Partner with us to power your data center operations 24/7 with solutions that are space-saving, time-saving, energy-saving, cost-saving and scalable. Our power distribution solutions include medium and low voltage switchgear, circuit breakers, switching technology, UPS, AVR, remote power controls and generator set installation for your complete power backbone.
Hyper Convergence Infrastructure (HCI)

Nutanix

Nutanix provides a single platform that unifies hybrid multi-cloud management. The Nutanix cloud platform integrates compute, virtualization, storage, networking, security, and containers, and simplifies day to day management of a companys IT environment. The Nutanix cloud platform also extends from private to public clouds, currently available on Amazon Web Services, with support for Microsoft Azure.

Security Software Products

Extended Detection and Response (XDR)

Increase SOC efficiency and productivity by achieving a single-pane of visibility & analysis for siloed data streams. Reduce the costs associated with configuring and integrating multiple point solutions with a fulky integrated cybersecurity platform. Products include Sentinel One XDR and EDR platforms.

SentinelOne®

Endpoint Cloud Protection Platform

Our cloud-based approach means your users can work securely on any device, and collaborate safely online, at work or at home, from remote offices and in the field. And our cloud-based console means your security can be managed from anywhere, any time. Kaspersky Endpoint Security Cloud provides a single solution for all your organizations IT security needs. You can make sure your business Is running smoothly while Kaspersky is blocking ransomware, file-less malware, zero day attacks and other emerging threats.

Network Detection and Response

Monitor network traffic for malicious actors and SUSPICIOUS behaviour, and react and respond to the detection of cyber threats to the network by leveraging cloud-scale machine learning to deliver complete visibility into networks, real-time detection, and intelligent response. Products include Darkrace and ExtraHop Reveal(x).

DARKTRACE   **ExtraHop**

Secure Access Service Edge (SASE)

Address cloud service risks, enforce security policies, and comply with regulations, even when cloud services are beyond your perimeter and out of your direct control with on-premises, or cloud-based security policy enforcement points, placed between cloud service consumers and cloud service providers to combine and interject enterprise security policies e.g. DLP, as the cloud-basead resources are accessed. Products include the Netskope CASB/SWG/ZTNA platform.

Vulnerability and Compliance Management

For strong security and compliance, you need a complete, continuously updated, and detailed IT asset inventory. Qualys automatically discovers, normalizes and catalogs all your IT assets, wherever they reside: on-prem (devices and apps) endpoints, clouds and containers. Qualys File Integrity Management captures advanced insights into file changes, including the 'who-data' for the event i.e., the user and process responsible for the change along with other critical details like the name of the file, asset details and the exact timestamp.

Qualys.

Backup and Ransomware Recovery Protection

Quickly restore to the most recent clean version of your data, whether you need to do a full, orchestrated recovery or partial system restore. Integrate Rubrik into popular SIEM, SOAR, Syslog, or security automation frameworks using our APIs for automated recoveries and enriched intelligence. Products Include our Rubrik security Cloud platform and other advanced solutions.

rubrik

Backup and Disaster Recovery

Your organisation cannot afford to neglect backup or disaster recovery, If it takes hours to retrieve lost data after an accidental deletion, your employees or partners Will sit idle, unable to complete business-critical processes that rely on your technology. And if it takes days to bring your business back online after a disaster you stand to permanently lose customers. Products Include Veeam Data Protection platform.

veeAM

Security Analytics and Log Management

Use data collection, aggregation and analysis capabilities to perform vital security functions that detect, analyse and mitigate cyberthreats. Security analytics tools and security monitoring are deployed with the alm of identifying and investigating security incidents or potential threats such as external malware, targeted attacks and malicious insiders. Products include Splunk Enterprise and Enterprise Security.

splunk>enterprise
Microsoft 365 Backup and Recovery

Assign data management policies with one SLA policy engine for your entire Microsoft 365 subscription, site, or to individual end users. All user-created and default folders in mailboxes within that organisation are automatically protected. Quickly restore Exchange Online, SharePoint, OneDrive, and Teams data In just three clicks. Easily locate data with global, predictive, filelevel search to recover with near zero RTOs and to maintain business continulty.

Privileged Access Management

Exert control over the elevated privileged access and permissions for users, accounts, processes, and systems across your IT environment by putting in the appropriate level of privileged access controls, Condense your organisation's attack surface, and prevent, or at least mitigate, the damage arising from external attacks as well as from Insider malfeasance or negligence. Products include Securden, Beyond Trust and Delinea.

GL BAL SECURE

Multi Factor Authentication

Automatically discover all the applications and resources in your environment and connect any type of resource, including legacy apps, IT infrastructure, on-premise servers and workstations, as well as other resources that couldn't be natively migrated. Silverfort let's you apply fine grained policies across all sensitive corporate and cloud assets and easily extend protection to interfaces and access tools that currently allow attackers to bypass all other MFA solutions (Remote PowerShell, PSExec, etc.).

SILVERFORT

Identity Management & Governance

In business today, change Is constant. As workers join and leave companies with greater frequency, streamlining onboarding and off-boarding becomes more important. Manual processes open the door to unnecessary workloads and human error that can result in significant risk and lost oroductivity. IDM automation makes It easy to quickly grant, modify or revoke access. Improve your compliance, boost oroductivity and reduce costs by streamlining processes. Products include Securends and ForgeRock.

ForgeRock®   SECUR·ENDS

Cybersecurity Attack Simulation Training

Experience the worlds most advanced cyber range, available on-demand. Immerse your team in hyperrealistic, simulated attacks on the included cyber range to take their experience, skillset, and teamwork to the next level. Cyber range simulations are the closest your team will get to a real-world incident. By training in cyber range exercises your team will excel, both technically and mentally, when the real attack takes olace. Products include Cymulate, Cyberbit and Cloud Range.

Cymulate   cyberbit   CLOUD RANGE

Workforce Productivity Monitoring

Gain real time statistics of your employees' performance ready at your fingertips. Track attendance, application usage, productivity trend and more. Always know how your employees use their time by tracking application and website usage, and overall productivity to enable your HR team get verified working hours for payroll. Use our workforce productivity software to auto detect slacking employees, regularly by customising rules to filter employees who are working less, being idle or engaging In unproductive activities.

Email Security

Email is the number one threat vector, with 96% of SUSPICIOUS Social actions arriving through email. In addition to common email threats like phishing attacks and malware, emerging BEC scams pose a new threat to organizations. Catch both known and unknown threats that others miss with robust encryption and DLP Capabilities through the same platform. This tight integration helps you manage sensitive data via email and prevent data loss. Our solutions include Proofpoint Secure Gateway and Tessian Cloud Email Security.
